FDNY Crisis Counseling-Paul Greene 2006-04-07 Shortly after the September 11th attacks, as the New York City Fire Department (FDNY) started their recovery work in the ruins of the World Trade Center, a large-scale mental health response within the FDNY swung into action, initiated by the under the direction of their own counselors. The crisis counseling abilities, the story of this ongoing response from the perspective of those who put it into practice. Using narrative, case studies, and other real-world examples, this unique new resource lays out a roadmap for applying innovative approaches to disaster response and the prevention of Posttraumatic Stress Disorder. The pioneering efforts of the FDNY present a model for all mental health professionals working with organizations, communities, individuals, and families.

Trauma Psychology-Elizabeth K. Carl 2007-01-01 Experts present current knowledge and emerging research on trauma from events as diverse as kidnapping, killing, and terrorism to those as common and widespread as injuries from motor vehicle accidents or burns to homelessness and violence against women.

Fundamentals of Crisis Counseling-Gert Miller 2011-09-23 An indispensable handbook for assisting clients in crisis and in their journey toward healing. Integrating practical training with both research and theory, Fundamentals of Crisis Counseling offers students and professionals proven hands-on techniques to assist clients in recovery from crisis and towards an eventual return to their day-to-day lives. Stemming from the author's thirty-five years of experience as a crisis counselor, this book contains valuable information on: Crisis theory and intervention models Concepts, techniques, assessment, and treatment for disatermental health work Legal and ethical concerns regarding working with individuals, groups, couples, and families Assessment and instrument selection Main concepts and techniques of brief therapy, motivational interviewing, stages of change, positive psychology, grief therapy, client resilience, and spirituality Multicultural crisis counseling techniques centered on age, gender, sexual orientation, and ethnicity. Counseling self-care complete with case studies and examples Ideal for mental health and social work students and practitioners, this book offers the best practices in crisis counseling, this book is also suitable for training professionals and counseling students. The book includes access to an online instructor's test bank, PowerPointslides, and syllabi in line with 2009 Council for Accreditation of Counseling and Related Educational Programs (CACREP) standards. Fundamentals of Crisis Counseling imparts useful knowledge on crisis counseling abilities, preparing counselors every stage to effectively respond to the immediate and lasting affects of crisis. Grief and Bereavement in Contemporary Society-Robert A. Neimeyer 2011-06-15 Grief and Bereavement in Contemporary Society is an authoritative guide to the study of and work with major themes in bereavement. Its chapters synthesize the best of research-based conceptualization and clinical wisdom across 30 of the most important topics in the field. The volume's contributors come from around the world, and their work reflects a level of cultural awareness of the diversity and universality of bereavement and its challenges that has rarely been approximated by other volumes. This is a readable, engaging, and comprehensive book that will share the most important scientific and applied work on the contemporary scene with a broad international audience, and as such, it will be an essential addition to anyone with a serious interest in death, dying, and bereavement.

Learning the Language of Addiction Counseling-Gert Miller 2014-09-09 FULLY REVISED, COMPREHENSIVE, AND PRACTICAL Learning the Language of Addiction Counseling, Fourth Edition introduces counselors, social workers, and students to the field of addiction counseling and helps them acquire the knowledge and develop the skills needed to counsel individuals who are caught in the destructive cycle of addiction. Drawing from her years of experience working in the addiction-counseling field, Geri Miller provides an engaging, balanced overview of the major theoretical foundations and clinical best practices in the field. Fully updated, the Fourth Edition offers a positive, practice-oriented counseling framework and features: A research-based, clinical application approach to addiction counseling that practitioners can turn to for fundamental, practical, clinical guidelines Revised chapters that reflect important changes in research and practice, including new DSM-5 criteria, new assessment instruments, and new and expanded treatments Case studies, interactive exercises, end-of-chapter questions, and other resources that facilitate the integration of knowledge into practice "Personal Reflections" sections at the beginning of each chapter provide an invaluable, unique perspective on the author's evolving views of addiction counseling Updated and expanded online Instructor's Manual that includes brief video clips of crisis counselors, test bank questions for each chapter, and sample syllabi From assessment and diagnosis of addiction to preparing for certification and licensure as an addiction professional, this comprehensive book covers all of the essentials. Psychosocial Capacity Building in Response to Disasters-Joshua L. Miller 2012 This book integrates Western mental health approaches and international models of psychosocial capacity building within a social ecology framework, providing practitioners and volunteers with a blueprint for individual, family, group, and community interventions. Joshua L. Miller focuses on a range of disasters at local, regional, national, and international levels. Global case studies explore the social, psychological, economic, political, and cultural issues affecting various reactions to disasters and illustrate the importance of drawing on local cultural practices to promote empowerment and resiliency. Miller encourages developing people's capacity to direct their own recovery, using a social ecology framework to conceptualize disasters and their consequences. He also considers sources of vulnerability and how to support individual, family, and community resiliency; adapt and implement traditional disaster mental health interventions in different contexts; use groups and activities to facilitate recovery as part of a larger strategy of psychosocial capacity building; and foster collective grieving and memorializing. Miller's text examines the unique dynamics of intergroup conflict and the relationship between psychosocial healing, social justice, and peace and reconciliation.

The Encyclopedia of Social Work-Terry Mizrahi 2008-04-24 This 20e contains 400 articles which represent a thoroughly updated and expanded volume of the world's leading source of evidence-based guidance on social work practice, including new DSMTM-5 criteria, new assessment instruments, and new and expanded treatments Case studies, interactive exercises, end-of-chapter questions, and other resources that facilitate the integration of knowledge into practice "Personal Reflections" sections at the beginning of each chapter provide an invaluable, unique perspective on the author's evolving views of addiction counseling Updated and expanded online Instructor's Manual that includes brief video clips of crisis counselors, test bank questions for each chapter, and sample syllabi From assessment and diagnosis of addiction to preparing for certification and licensure as an addiction professional, this comprehensive book covers all of the essentials. Healing Together-Dianne Kane 2009-01-02 After a traumatic experience, we are told time and time again to take care of ourselves and reach out to the people we love. But what happens when you reach out and your partner can't reach back? This book is for people in relationships where either partner has faced trauma in any of its forms: violence, natural disasters, war, life-threatening accidents, crime, health problems, or loss of a loved one. One or both partners can use Healing Together to recover from trauma or help their partner recover by understanding the impact of trauma, learning to communicate their needs, managing anger, dealing with traumatic memories, recapturing lost intimacy, and recognizing their resilience as a couple. The practical, step-by-step program presented in this guide is inspired and informed by the authors' clinical experiences with patients suffering from post-traumatic stress disorder and their work with firefighters and their partners in the aftermath of 9/11. In the wake of tragedy, this book can help you build a resilient relationship and move forward with compassion, hope, and love. Healing Together is a beautiful book... an invaluable resource that will help couples face their traumas together. Sue Johnson, Ph.D., professor of psychology at University of Ottawa and author of Hold Me Tight Care at the Close of Life: Evidence and Experience-Stephen J. McPhee 2010-12-31 The world's leading source of evidence-based guidance on caring for patients at the end of life. Featuring the content of the world's
most widely read medical journal, plus completely new, never-before-published content. Perfect for medical students, trainees, and clinicians alike. Market/Access: Medical; US, 250,000+ global NP and PA students: 25,000/yr US, 50,000+ global IM and FP residents: 30,000 US, 60,000 global IM and FP clinicians: 140,000 US, 300,000+ global Palliative medicine: 3000 US Oncology: 20,000 US, 60,000 global Social workers About the Book The Invention of the User’s Guides to the Medical Literature, and The Rational Clinical Examination, JAMA/Care at the Close of Life is based on the successful RAPID (Rational, Agitated, Person-Centered, Interventions, and Dementia) model of the course of the last ten years in JAMA, the world’s most widely read medical journal. The series is directed by Stephen McPhee, a leading authority of end of life care, and the chief editor of our market leading Current Medical Diagnosis and Treatment text. The articles in the series cover fundamental topics and challenges facing for patients who have been given a terminal diagnosis. Featuring a strong focus on evidence-based medicine and an emphasis on clear and direct writing, the articles are written in a way that is accessible for all readers. The articles are organized by clinical cases, the articles are widely read by faculty, medical students, and clinicians who, frankly, have not been given a solid educational experience on this very important medical issue. The book will be physically modeled after The Rational Clinical Examination, in a full color format that highlights the clinical cases. It will be well suited for use as an required or recommended textbook for medical, PA, and NO students, and as a clinical reference text for trainees and practicing physicians and nurses. Key Selling Features Based on highly regarded content from the world’s most widely read medical journal All content is completely updated, and extensive new, never-before-published content has been added Case-based, and evidence-based PFA method is perfect for the way medical students and residents like to learn Focuses on practical, real-world issues for primary care physicians, and avoids esoteric issues of interest only to specialists in palliative care Full color format, modeled after the highly regarded Rational Clinical Examination Includes multimedia materials available on-line: Power Point slides for teaching, and video interviews with patients in end of life care that facilitate the development of vital resources for learning the art and science of care at the end of life Evidence-based guidance from the world’s leading medical journal, on a critical topic that has been neglected in medical education and training until recently. Author Profile JAMA is the world’s most widely read medical journal, and has a reputation for excellence in evidence-based medicine. Stephen McPhee has high visibility on account of his editorship of CMDT, and for his driving role in enhancing end of life care in medical education and training programs. He is: Professor of Medicine, UCSF School of Medicine, San Francisco CA Annual Meeting of the American Public Health Association and Related OrganizationsAmerican Public Health Association 1989 The Johns Hopkins Guide to Psychological First Aid-George S. Everly, Jr. 2017-04 Psychological first aid, or PFA, is designed to mitigate the effects of acute stress and trauma and assist those in crisis to cope effectively with adversity. PFA is designed to be applied in emergencies, including disasters and terrorist attacks. In this essential guide, George S. Everly, Jr., developer of the Johns Hopkins Guide to Psychological First Aid, provides a PFA method, in collaboration with the center on the psychology of terrorism in the field of health literacy has evolved from early efforts that focused on health literacy and skills and the unique, complex, chaotic, and highly political field of disaster. It combines information from a vast reservoir of prior research and literature with the authors’ practical and pragmatic experience in providing disaster mental health services. The comprehensive, whole-systems approach of disaster Handbook of Oncology Social Work-Grace Christ 2015-01-28 The development of this inaugural Handbook of Oncology Social Work: Psychosocial Care for People With Cancer provides a repository of the scope of oncology social workers’ clinical practice, education, research, policy and program leadership in the psychosocial care of people with cancer and their families. It focuses on the unique synergy of social work perspectives, values, knowledge, and skills with the psychosocial needs of cancer patients, their families, and the health care systems in which they are treated. It addresses both the science and art of psychosocial care and identifies the increasing specialization of oncology social work related to its unique knowledge base, the patient, and the psychosocial challenges for patients with cancer. This handbook equips the reader with all that we know today in oncology social work about patient and family centered care, distress screening, genetics, survivorship, care coordination, sociocultural and economic diversity, legal and ethical matters, clinical work with adults living with cancer, cancer across the lifespan, their caregivers, and for health professionals. It offers a comprehensive professional career development, leadership, and innovation. Our hope is that in reading this Handbook you will identify new areas where each of you can leave your mark as innovators and change agents in our evolving field of practice. The Handbook of School Psychology-Cecil R. Reynolds 2009 As the standard reference in the field, this edited handbook focuses on how a school psychologist can operate and create change within the educational system instead of focusing solely on the diagnosis and treatment of an individual. Chapters have been updated and revised to provide a contemporary view of the field. The Foundation Grants Index- 1994 Healing Children’s Grief-Grace Hyslop Christ 2000 The author “relates the powerfully moving stories of eighty-eight families and their 157 children (ages 3 to 7) who participated in a parent-guidance intervention through the terminal illness and death of one of the parents from cancer.”–Cover. Pediatric AIDS –1989 Disaster Spiritual Care-Willard W. C. Ashley Sr 2017-06-13 The first comprehensive resource for pastoral care in the face of disaster–a vital resource for clergy, seminarians, pastoral counselors and caregivers of all faith traditions. Updated and expanded! This essential resource for clergy and caregivers integrates the classic foundations of pastoral care with the unique challenges of disaster response on community, national and international levels. Offering the latest theological perspectives and tools—along with basic theory and skills from the best disaster response texts, research and concepts—the contributors to this resource are innovators in their fields and represent Christianity, Judaism, Islam and more. New to this edition are chapters on: N-VOAD Points of Consensus and Guidelines–A Developing Conversation Ethics in Disaster Spiritual Care Assessment Developing a Theological Framework for Providing Disaster Spiritual Care And More Exploring how spiritual care changes following a disaster, and including a comprehensive explanation of a disaster’s lifecycle, this is the definitive guidebook for counseling not only the victims of disaster but also the clergy and caregivers who are called to service in the wake of crisis. The Intersection of Behavioral Health, Mental Health, and the Field of Health Literacy- National Academies of Sciences, Engineering, and Medicine 2019-04-26 The field of health literacy has evolved from early efforts that focused on individuals to its current recognition that health literacy is a multidimensional team and system function. Health literacy includes system demands and complex as well as a multidimensional and complex. While communicating in a health-literate manner is truly important for everyone, it can be especially important for those with mental or behavioral health issues and for the systems and teams that interact with them and treat these individuals. The purpose of the workshop, which was held on July 11, 2016, in Washington, DC, was to explore issues associated with effective communication with individuals with mental or behavioral health issues and to identify ways in which health literacy approaches can facilitate communication. In particular, the workshop aimed to gain a better understanding of how behavioral health and mental health concerns can adversely affect communications between providers and patients and their families. This publication summarizes the presentations and discussions.
Professionals who provide services to these children must be able to quickly respond to new information. Informing an Effective Response to Climate Change, a volume in the America’s Climate Choices series, describes and assesses different activities, products, strategies, and tools for informing decision makers about climate change and helping them plan and execute effective, integrated responses. It discusses who is making decisions (on the local, state, and national levels), who should be providing information to make decisions, and how that information should be provided. It covers all levels of decision making, including international, state, and individual decision making. While most existing research has focused on the physical aspect of climate change, Informing an Effective Response to Climate Change employs theory and case study to describe the efforts undertaken so far, and to guide the development of future decision-making resources. Informing an Effective Response to Climate Change offers much-needed guidance to those creating public policy and assists in implementing that policy. The information presented in this book will be invaluable to the research community, especially social scientists studying climate change; practitioners of decision-making assistance, including advocacy organizations, non-profits, and government agencies; and college-level teachers and students.

Bibliography of Agriculture- 1989
Statewide Comprehensive Plan for Mental Health Services- 2002

Preparing for the Unimaginable-Usher, Laura 2018-01-16 While most government agencies are trained in how to react to a mass casualty event such as a terrorist attack or natural disaster, few are prepared to deal with the psychological fallout for first responders. Preparing for the Unimaginable fills that void. This book is the product of the National Alliance on Mental Illness’s work with the Newtown, Connecticut, police force in efforts to cope with the shooting at Sandy Hook Elementary school that left twenty six people, including twenty children, dead. This unique publication offers expert advice and practical tips for helping officers to heal emotionally, managing the public, dealing with the media, building relationships with other first responder agencies, and much more. Complete with first-hand accounts from the scene and its experiential contexts. It also tackles the theoretical challenge of bridging the traditional divide between international relations and comparative politics.

City Limits- 2003

Preventing the Unimaginable-Usher, Laura 2018-01-16 While most government agencies are trained in how to react to a mass casualty event such as a terrorist attack or natural disaster, few are prepared to deal with the psychological fallout for first responders. Preparing for the Unimaginable fills that void. This book is the product of the National Alliance on Mental Illness’s work with the Newtown, Connecticut, police force in efforts to cope with the shooting at Sandy Hook Elementary school that left twenty six people, including twenty children, dead. This unique publication offers expert advice and practical tips for helping officers to heal emotionally, managing the public, dealing with the media, building relationships with other first responder agencies, and much more. Complete with first-hand accounts from the scene and its experiential contexts. It also tackles the theoretical challenge of bridging the traditional divide between international relations and comparative politics.
Assessing Genetic Risks—Institute of Medicine 1994-01-01 Raising hopes for disease treatment and prevention, but also the specter of discrimination and "designer genes," genetic testing is potentially one of the most socially explosive developments of our time. This book presents a current assessment of this rapidly evolving field, offering principles for actions and research and recommendations on key issues in genetic testing and screening. Advantages of early genetic knowledge are balanced with issues associated with such knowledge: availability of treatment, privacy and discrimination, personal decisionmaking, public health objectives, cost, and more. Among the important issues covered: Quality control in genetic testing. Appropriate roles for public agencies, private health practitioners, and laboratories. Value-neutral education and counseling for persons considering testing. Use of test results in insurance, employment, and other settings.

Crisis Leadership—Tim Johnson 2017-11-16 Anyone in a leadership position is only too aware that we live in uncertain times: disaster can strike any business, at any time, and usually without warning. Public institutions, too, face a range of threats—from global recession, resurgent terrorism and a stream of appalling natural disasters. For leaders in such organisations, these crisis situations can present both opportunities and threats. How they lead through such challenging times will propel their careers to new heights—or destroy them completely. Crisis Leadership examines the challenges faced by leaders at each stage of the crisis 'lifecycle', from the instant they learn of the crisis, through to moments of critical decision-making and the final tumultuous days. Tim Johnson offers a unique insight into the lessons learned by people in the most challenging of situations. Blended with operational guidance from the author's extensive experience in crisis management, Crisis Leadership provides an overview of the crisis 'lifecycle', to ensure that readers will come away from this book with a deeper appreciation of the critical nature of each key stage and the leadership challenges they bring—from the first signs of an emerging crisis to dealing with the long-term consequences they can create.

Proactive Policing—National Academies of Sciences, Engineering, and Medicine 2018-03-23 Proactive policing, as a strategic approach used by police agencies to prevent crime, is a relatively new phenomenon in the United States. It developed from a crisis in confidence in policing that began to emerge in the 1960s because of social unrest, rising crime rates, and growing skepticism regarding the effectiveness of standard approaches to policing. In response, beginning in the 1980s and 1990s, innovative police practices and policies that took a more proactive approach began to develop. This report uses the term "proactive policing" to refer to all policing strategies that have as one of their goals the prevention or reduction of crime and disorder and that are not reactive in terms of focusing primarily on uncovering ongoing crime or on investigating or responding to crimes once they have occurred. Proactive policing is distinguished from the everyday decisions of police officers to be proactive in specific situations and instead refers to a strategic decision by police agencies to use proactive police responses in a programmatic way to reduce crime. Today, proactive policing strategies are used widely in the United States. They are not isolated programs used by a select group of agencies but rather a set of ideas that have spread across the landscape of policing. Proactive Policing reviews the evidence and discusses the data and methodological gaps on: (1) the effects of different forms of proactive policing on crime; (2) whether they are applied in a discriminatory manner; (3) whether they are being used in a legal fashion; and (4) community reaction. This report offers a comprehensive evaluation of proactive policing that includes not only its crime prevention impacts but also its broader implications for justice and U.S. communities.
